“Rules on Eco-Label award to environmentally-friendly products and services”

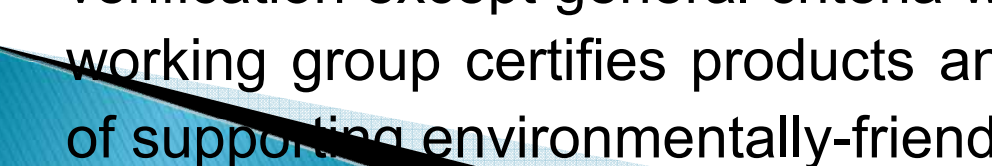

updated rules

Within the framework of developing standards, conditions and requirements for Eco-Label award in conformity with international standards, a working group, which was formed by Order # A-317 of October 20, 2010 made by Minister of Nature, Environment and Tourism of Mongolia, have developed a draft project.

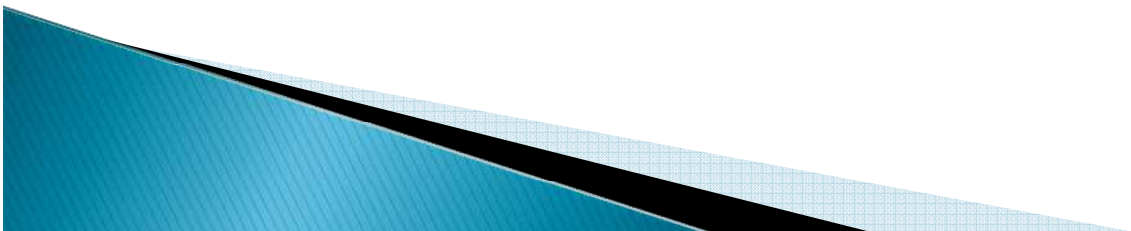

“Rules on Eco-Label award to environmentally-friendly products and services” includes a total of 8 chapters and 51 clauses.

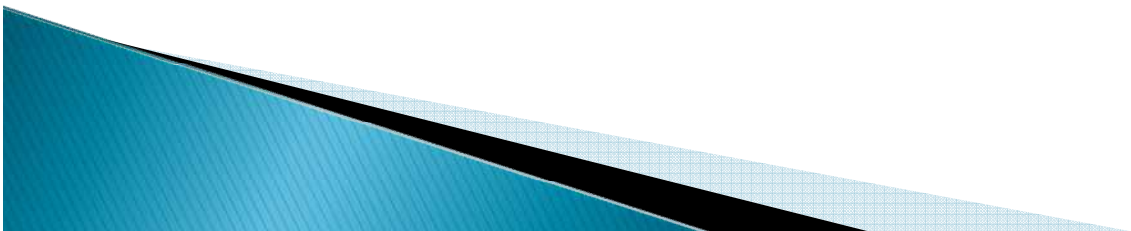

Amendments and changes of updated draft rules

- ✓ A word “selected” according to rules of encouraging the entities, organizations and individuals which introduced environmentally-friendly products and services, is replaced by “eco-label will be awarded to entities, organizations and individuals which introduced environmentally-friendly products and services on a voluntary basis”.
 - ✓ According to old rules, Eco-label was awarded in terms of parameters of entities and organizations. Now a working group increased general criteria in connection with award for “new products and services” and a working will approve special criteria depending on kinds and types of products and services.
 - ✓ A certified laboratory reference, standardization statement and verification except general criteria will be required because this working group certifies products and services for the purpose of supporting environmentally-friendly national production.
- 

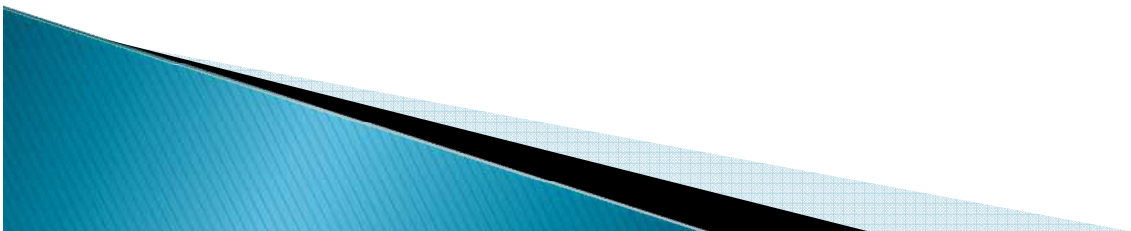

- For documents, which are required to be attached to application for Eco-label right, there is no changes made, but some things were added for the purpose of making the responsibilities and obligations of entities, organizations and citizens, which got eco-label right, clear and improving the participation of eco-label awarding body.
- A working group, which issues “Eco-label”, is independent and its activity will be open. And this group will consist of representatives of government and non-government public organizations, private sector and consumerism organizations of nature and economic fields.

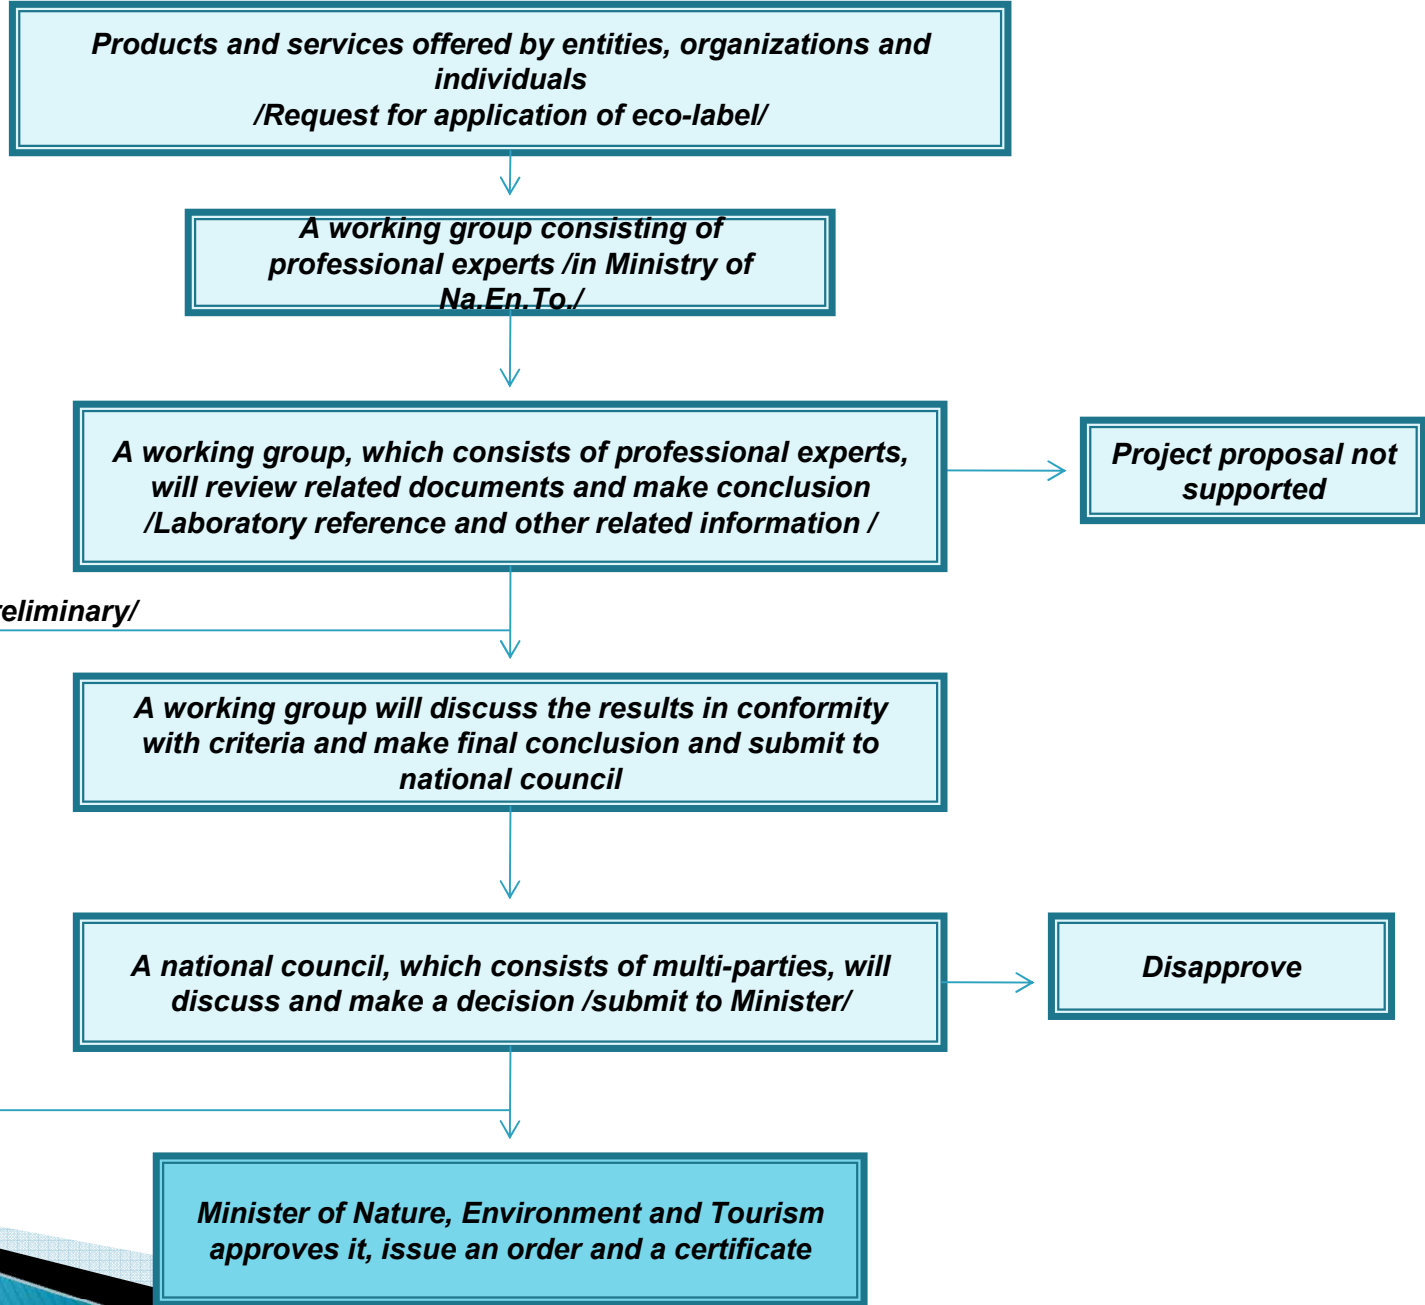

- As well as “eco-label” will be granted with a contract and parties will pay attention to implementation of contract and will make reports on its implementation.
- “If Eco-label award holder violates the criteria included in rules approved by Government Resolution#95 of 1998” is changed as “Eco-label holder will perform contract provisions, constantly meet the criteria for eco products and services and have its products tested timely”.
- Definitions have been put and made them more clear.

- “Promotion and support activity” has been added for the purpose of increase the intentions of entities, organizations and citizens which want to get eco-label for their products and services and protecting and promoting the interest of customers and clients. Except that, new rules for “eco-label award” includes 8 articles and is developed to improve standards, conditions and requirements.
- Updated rules determines the participation of authorized body and obligations of a working group and develops standards, conditions and requirements for eco-label award and make those consistent with international standards. Next page shows “eco-label” phases scheme.

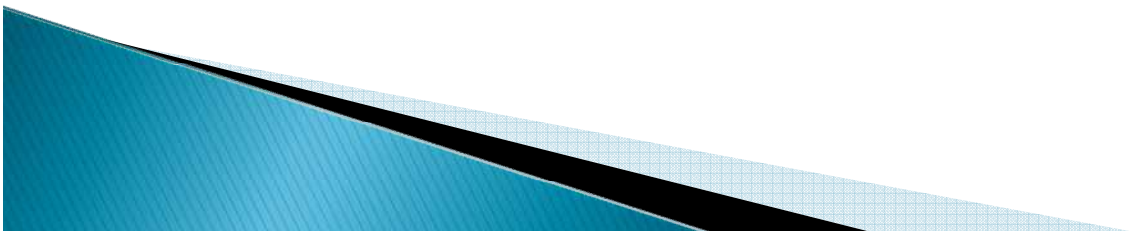

“Eco-Label” award phases

Further actions
