

Introduction of Green Hotel Eco-label

MNCCI, Sustainable Production and
Consumption Department

Intro

- The Green Hotel eco label is a voluntary environmental label. It was established in 2012 to certify the hotels and lodging properties' environmentally friendly management activities.

Definition of GREEN HOTEL eco label

- The Eco label shape looks like Mongolian traditional household called GER
- The Eco label keeps meaning GREEN HOTEL
- Exhaust pipe described as a leaf and way of writing GREEN HOTEL both stand for environmentally friendly sign.

Criteria to be fulfilled to be award GREEN HOTEL eco label

	Things to do	Aim/benefits	Criteria
Energy Efficiency	Use alternative energy	Will use clean energy in the form of wind power, solar power, hydro-electric power and/or bio fuel.	At least 51% of the electricity used for all purpose shall come from renewable energy sources.
	Develop energy conservation program	Will reduce heat and cooling, air conditioning and lightening cost and through reduction of hotel water and laundry water.	-Put information card about switch off lights in the room, hall and lobby. -Use energy efficient appliances that provide large gains in energy efficiency and reduction of pollution. -Give instruction how to switch off unused equipments
	Use fluorescent lightening	2 times cost-effectives than using incandescent lamp	100%
Water Conservation	Use low-flow showers and toilets and self-regulating sink.	Will decrease water and energy by using low-flow toilets which are specifically designed to use less water during each flush and low-flow showerheads use less hot water.	At least 51% of all sink, shower and tap should be water saving and self-regulating.

Criteria to be fulfilled to be award GREEN HOTEL eco label

	Things to do	Aim/benefits	Criteria
